Item 15.2 CDG1175 Community Gym & Wellbeing Facility

Reporting: **Growth & Strategy Manager – Helen Thomas**

SUMMARY:
This report provides an update on activity on the Community Gym for December 2023. This includes:

- Communication with grant administrator
- Resurfacing of tennis and netball courts
- Community communications

DISCUSSION:

Communication with the grant administrator

Further to Council's resolution to reduce the scope of this grant, the project team have advised the Commonwealth grant administrator of this decision. We have committed to providing a revised project scope, budget and program by the end of February 2024.

Resurfacing of tennis and netball courts

Following Council's resolution regarding the scope of the grant, the project team planned how to secure a contractor for the resurfacing of the courts and confirm a budget for this element of the project. Once that budget is known, scoping of the other works to make these courts playable, such as fencing and fixed equipment, will be refined and suitable contractors identified.
More information is expected to be available through January 2024.

Community communications

The change of scope in this project is significant and the project team are keen to ensure that all our key stakeholders, including community, are informed about this change. An updated communication plan will be developed and actioned by the project team to facilitate this, engaging with the Mayor as the official spokesperson for Council as appropriate.

FINANCIAL IMPLICATIONS:

The activities detailed above are included within approved budgets, except where indicated otherwise.

ATTACHMENTS:

Nil

Recommendation:

That Council receive and note the report for the Community Gym & Wellbeing Facility project for December 2023.
